

**ACTION HISTORY OF RTI REQUEST No.NIAHB/R/T/20/00002**

**Applicant Name**

Dear Sir/Madam, I am a researcher interested in developing novel vaccine and therapeutic solutions to veterinary diseases of economical importance. Currently, my research interest is Inclusion Body Hepatitis (IBH)/Hepatitis-Hydropericardium Syndrome (HPS) in poultry birds in India. I tried everywhere to find some information on this topic from reliable sources. However, I could not find any documented report/statistics on this issue in India. So, I hereby request you to please provide me a detailed data on the prevalence of IBH/HPS in different states in India along with a verified opinion on the current hotspots for this disease in various Indian states. As you are aware, there is a licensed inactivated vaccine available for this disease from various manufacturers in India. In this regard, I would like to know the status on the use of this licensed IBH vaccine in various Indian states by poultry farmers, its field efficacy and the safety issues, if any, with these vaccines. Thank you Sincerely
